CLASS 4 LESSON PLAN

Structure and Deterioration of Multimedia Materials

Taking It Further—Beyond the Primary Lesson

Additional Topics for Discussion

For Class 4, additional topics for discussion have not been separated out, since the level of detail covered for each topic in the lesson outline will depend significantly on the interests and specialties of the instructor. All topics in the outline should be addressed at least briefly, and the instructor should expand on certain topics at his or her discretion. For topics that are addressed only in brief, students should be directed to additional resources (see [Suggested Readings for Students—For Further Study](#)).
